

Enterprise solutions

The 12Manage and 12Solutions are designed and created by qualified Unitech software engineers.

12Manage and 12Solutions are **free of charge** for Unitech Partners. Visit our Partner Portal: <http://portal.unitech.eu>.

Remote Device Management

12Manage is an internet based device management system. This Unitech solution is created to ease the management and integration of devices. It will allow 24/7 access to a portal giving instant views on the complete install base of mobile computers.

Key Features 12Manage:

- ✓ Easy to setup and manage.
- ✓ Overview of all devices and their connection status.
- ✓ View status detail of connected devices (battery, Wifi, etc.).
- ✓ Remote control.
- ✓ Auto update or publish software packages to devices.
- ✓ Multiple admin ability.
- ✓ Proximity location of devices, lost & found.*
- ✓ and more...

Software and Applications

To offer customers the best service, products and solutions, Unitech Europe develops software to help customers to achieve higher productivity and more efficient operations.

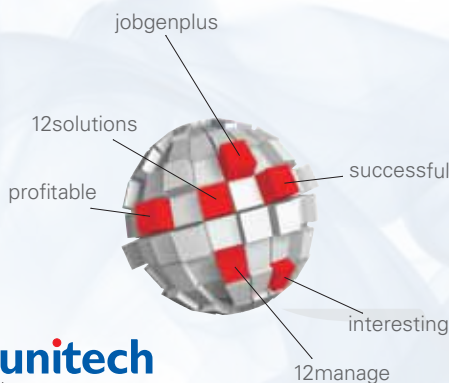

Some of Unitech's 12Solutions:

- ✓ AutoInstaller - Full automated customized installation.
- ✓ 12Monitor - Unitech's own designed secure Desktop. (Modify user's access permissions and abilities).
- ✓ Rfid2Key - Easy read and storage RFID data. (Transfer all RFID information to the keyboard buffer).
- ✓ JGPe - Uplift your current DOS-based applications for Windows Embedded devices.
- ✓ and many more...
